Alberta's International Exports
January to December 1999
Highlights

Overview: In 1999, the value of Alberta's international exports of goods rose strongly by 11.4% from 1998, to a record \$34.5 billion. Higher prices for a number of Alberta's major commodity exports, e.g. crude oil, natural gas, lumber and oriented strand board (o.s.b.), and increased volumes of natural gas, beef, telecommunication transmission equipment, coal, and other commodities, were the major causes of this increase. Exports to the US rose \$3.9 billion to \$29.2 billion, but exports to the rest of the world declined by \$0.4 billion to \$5.3 billion. Alberta's exports rose sharply by 32% in the fourth quarter of 1999, compared with the fourth quarter of 1998.

Major Commodities: Natural gas sales rose 22%, as a result of strong growth in both volumes and prices. Although volumes declined by 7%, sharply higher prices caused a 15% increase in the value of crude oil exports in 1999. Exports of transmission equipment, lumber, o.s.b. and beef also rose strongly. Exports of wheat, live cattle and canola declined.

Exports by Industry: Exports by the mining sector increased 16%, mainly because of higher prices for crude oil and natural gas. Primary agricultural exports declined by 19%, as exports of wheat (lower volumes), canola (lower prices) and live cattle (lower volumes) were down 14%, 22% and 33%, respectively. The manufacturing sector's exports increased 12%, as volumes, and to a lesser degree prices, increased. All of manufacturing's major sub-sectors, with the exception of machinery, had increased exports. The value of chemical exports rose 7%, electronics and electrical equipment 28%, food, feed and beverages 13%, pulp and paper 8%, and wood products 29%.

United States: In 1999, the value of exports to the US increased 15%, and the US accounted for 85% of Alberta's 1999 exports. The value

of exports of natural gas, crude oil, beef, transmission equipment, lumber and o.s.b. increased strongly. Exports of live cattle, propane and other liquefied natural gases fell.

Asia: Alberta's trade with Asia declined by 1% in 1999. Commodities with large declines include agricultural products, e.g. wheat, canola, malt and peas, and cobalt and artificial filament tow. Exports of wood pulp, sulphur and ethylene glycol increased strongly. Exports to Japan fell 5% and to Indonesia 31%, but exports to China, South Korea and Taiwan increased by 13%, 12% and 11%, respectively.

Europe: Total exports to Western Europe fell by 10% during 1999. Exports of cobalt, soya beans and used aircraft declined. Wheat, coal and iron and steel product exports increased. The UK's imports from Alberta fell 23%, Italy's 6%, Germany's 15% and the Netherlands' 17%. Exports to Eastern Europe declined by 39%. Exports to Russia fell 24%, and to Poland 75%, but exports to Croatia and Kyrgyzstan increased sharply.

Latin America: Alberta exports to South America were down 2%, as exports of wheat, durum wheat and sulphur fell sharply. Exports to Brazil fell 22%, but exports to Chile and Venezuela grew strongly. Exports to Central America declined by 20%, due to large declines for Alberta's largest two markets, Mexico and Cuba, which fell 19% and 41%, respectively.

Other Regions: Exports to the Middle East fell by 9%, largely due to large declines for Saudi Arabia, Kuwait, the UAE and Israel. Exports to Iran and Egypt rose strongly. African imports from Alberta dropped 24%. Imports by Algeria, Morocco, South Africa and Tunisia were sharply lower. Exports to the Oceania region were 13% higher in 1999. Exports to Australia rose 26%, but exports to New Zealand dropped.

(1) Due to a reporting error by Statistics Canada for Liquefied Petroleum Gases (other than Propane and Butanes), the Jan. - Mar. 1998 totals for Oil, Gas, Natural Gas Liquids & Sulphur and Total Exports are overstated. The 1999 estimates do not contain such an error.

Source of the data is Statistics Canada.

The term "Exports" refers to international shipments on merchandise; data on services trade is not readily available.

The industry breakdowns are constructed based on Statistics Canada's *Concordance Between the Canadian Export Classification, 1988*, (Based on the Harmonized Commodity Description and Coding System) and *Standard Industrial Classification, 1980*.

All data in this report are preliminary and subject to revisions.
